

ATTENTION NEW PATIENTS:

On the attached page are medications you need to be off of before we can perform any allergy testing. **Please read this carefully.** If you are not off of certain medications (such as antihistamines, inhalers and blood pressure medications) for the allotted time we won't be able to perform the allergy testing on your initial visit and you will have to come back in on another date for your testing. If you are taking medications either over the counter or prescribed please ask the receptionist if you will need to be off these medicines before you come in for your appointment.
